**Abstract:**

This article examines and analyzes the dynamics in the candidate students preferences and interests for the specialties available at the three science faculties of “St. Kliment Ohridski University of Sofia”, namely Faculty of Physics, Faculty of Biology and Faculty of Chemistry and Pharmacy. In order to achieve precise statistical data a frequency analysis has been made. It shows tendencies and search for correlations between the number of students candidates for higher education at Sofia University in the Faculty of Physics, Faculty of Biology and Faculty of Chemistry and Pharmacy and the number of first wishes for those faculties. The period of research is from 2005/2006 academic year to 2012/2013 academic year.
